Value-added water is comprised of flavored, enhanced, essence and alkaline waters, together which provide value above and beyond “just hydration.”

- Much of the new-product activity in the category has been in the enhanced water segment. Caffeinated and oxygenated brands were the pioneers, coming out about 20 years ago; but none ever reached critical mass.
- Vitamin-enhanced waters began to gain traction in 2000 with Glacéau Vitaminwater. Others emerged, such as Propel, which continues to be a good revenue source for PepsiCo.
- In 2005, flavored waters such as Nestlé Pure Life, Aquafina FlavorSplash and Dasani flavors hit the market. But the flavored water segment has not seen a whole lot of activity since.
- Flavored water, comprised of a few brands, is a more mainstream targeted segment, without specific functional benefits beyond hydration. Large beverage corporations such as Sunny Delight (now owned by buyout firm Brynwood Partners), Kraft Heinz, Coca-Cola, PepsiCo and BlueTriton (formerly, Nestlé) dominate this segment.
- In 2007, Coca-Cola Company acquired Glacéau Vitaminwater, the leader in the value-added water market. Vitaminwater introduced extensions — first Vitaminwater10 and then Vitaminwater Zero (in 2010) — to cushion a decline in the core Vitaminwater.
- PepsiCo’s SoBe Lifewater Zero vaulted past its regular calorie counterpart in 2014. (The regular and diet products are now amalgamated under the SoBeWater name.) Despite declining for more than a decade straight, SoBeWater Zero remained much bigger than SoBeWater. In fact, the last remaining SoBeWater variety was discontinued about four years ago.
- Although Coke has arguably mishandled Glacéau Vitaminwater, it has proved a more adept steward of stablemate Glacéau Smartwater, which has surpassed Vitaminwater. To maintain its solid double-digit growth momentum, Coke added a sparkling extension to the Smartwater trademark. Even Smartwater declined between 2016 and 2020, although it grew solidly in 2021 and 2022.
